PROFILE

For a long time, I considered changing the direction of my career, which led me to explore programming. I successfully completed the Vilnius Coding School JavaScript Full-Stack course, as well as the SOURCERY Academy for Front-End and the IamJunior JS Accelerator. These experiences deepened my passion for programming, allowing me to create innovative solutions and bring ideas to life. Programming excites me because it combines problem-solving, creativity, and continuous learning. I am now eager to contribute my skills and grow in a Frontend position.

SKILLS

- Website framework development using HTML5
- Website styling using CSS(Sass/Tailwind)
- Adding interactivity with JavaScript
- Type-safe coding with TypeScript
- Building websites with React.js
- API development using Express.js
- Creating databases with MongoDB
- Backend development using Node.js to build scalable server-side applications
